Subject: Application for Senior Backend Engineer

Dear Hiring Manager,

I am writing to express my interest in the Senior Backend Engineer position. With over five years of experience in backend software engineering and enterprise application development, along with my current role as Team Lead at Newgen Software, I am excited about the opportunity to contribute to your engineering team.

Throughout my career, I have designed, developed, and maintained backend applications for enterprise banking and financial services. I have extensive experience building Java-based backend solutions, developing and integrating RESTful APIs, optimizing SQL queries, and delivering scalable workflow automation systems used by banking clients. My work has involved the complete software development lifecycle—from requirements analysis and solution design to deployment and production support.

In my current role, I lead a team of over 20 engineers, driving Agile development practices, mentoring developers, conducting code reviews, and coordinating successful project deliveries. I enjoy collaborating across engineering, QA, and business teams to build reliable and maintainable software while ensuring high-quality releases.

Your focus on building scalable backend systems, optimizing performance, and collaborating within cloud-based environments strongly aligns with my career goals. While my primary expertise is in Java, SQL, REST APIs, Git, and enterprise backend systems, I have been actively expanding my knowledge in AWS, Docker, Kubernetes, Spring Boot, and modern cloud-native backend development through hands-on learning and personal projects. I am confident in my ability to quickly adapt to new technologies and contribute effectively to your backend platform.

I am particularly excited about the opportunity to work in a remote, engineering-focused environment where I can contribute to scalable backend services while continuing to grow my expertise in distributed systems and cloud technologies.

I would welcome the opportunity to discuss how my backend development experience, leadership skills, and passion for building high-quality software can contribute to your team. Thank you for your time and consideration. I look forward to hearing from you.

Sincerely,

Kodimala Sai Veena
